As a Full Stack developer with a focus on backend development, my main expertise lies in technologies like Node.js, Express, Nest.js, MongoDB, and PostgreSQL. Along with backend development, I also have experience in frontend development using React and Next.js.

In addition to my technical skills, I possess strong leadership and teamwork abilities, as well as experience with agile methodologies, GIT, data structures, algorithms, and frameworks. My passion for continuous learning has helped me develop soft skills such as effective communication and collaboration, making me a valuable asset to any team.

In summary, as a Full Stack developer with a focus on the backend, I am well-prepared to tackle any challenges in web application development. I am seeking a work environment that will allow me to continue to grow both technically and personally.
